

ENERGY | Conservation, Efficiency, and Renewables

JAN M. MADURO
Deputy Executive Director

ENERGY AFFAIRS ADMINISTRATION
Government of Puerto Rico

Agenda

- Key Areas of Energy Policy
- Energy Conservation and Efficiency
- Renewable Energy in Puerto Rico
- Programs and Incentives

ENERGY AFFAIRS ADMINISTRATION
Government of Puerto Rico

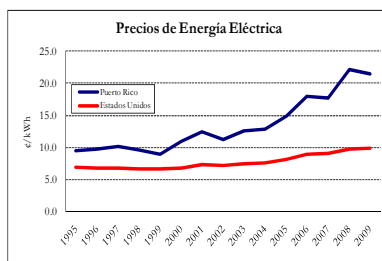

Energy in Puerto Rico

- Electricity Cost Affects our Competitiveness

- 2 times greater than the average electricity cost in the U.S.
- Mainly due to our high dependency on fossil fuels (99%), specifically in oil (70%).
- From 2004-2008 PR experienced a 11.6% increase in electricity price, compare to 5.2% in the U.S.

	¢/kWh
Wyoming	6.06
Louisiana	6.61
West Virginia	6.62
Illinois	9.29
Ohio	9.42
Pennsylvania	9.98
Texas	10.59
Florida	11.33
California	14.38
Hawaii	19.06
Puerto Rico	21.50
U.S. Total Av.	10.24

ENERGY AFFAIRS ADMINISTRATION

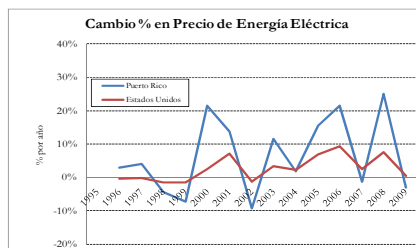

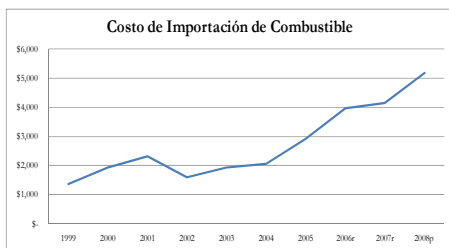

Government of Puerto Rico

Energy in Puerto Rico

- Oil Imports represents a large capital leak

- Puerto Rico expends **\$5.2 billions annually** in fuel imports (Petroleum and Coal).
 - No control over the import fuel prices.
 - Hence, our economy becomes dependant to price fluctuations.

ENERGY AFFAIRS ADMINISTRATION

Government of Puerto Rico

Key Areas of Energy Policy

- **Diversify energy portfolio in Puerto Rico**
 - Increase generation from renewable energy sources.
 - Utility scale projects
 - Distributed generation
 - Employ the use of Alternative Energy Sources
- **Promote and Enforce Energy Conservation and Efficiency Measures**

ENERGY AFFAIRS ADMINISTRATION

Government of Puerto Rico

Energy Conservation and Efficiency

- How is PREAA promoting Energy Conservation and Efficiency:
 - Developed the Puerto Rico Verde Campaign.

- Promote public awareness in energy matters.
- Create a new consciousness through energy conservation and efficiency measures.
- Based on a Turn off, Un-plug, and Replace policy.

ENERGY AFFAIRS ADMINISTRATION

Government of Puerto Rico

Energy Conservation and Efficiency

– Weatherization Assistance Program (**WAP**)

- enables low-income families to permanently reduce their energy consumption, hence their bills by effectively employing energy efficient appliances and equipment.

- Estimated number of units to be weatherized in Puerto Rico – 5,500 units
- Program developed 92 green jobs by certifying WAP auditors and inspectors.
- 1st Weatherized home completed in Loiza, P.R. on April 22, 2010.

ENERGY AFFAIRS ADMINISTRATION

Government of Puerto Rico

Energy Conservation and Efficiency

– State Appliance Rebate Program (**SEARP**)

- DOE award to PR – December 15, 2009
- A total of 18,021 vouchers were given, starting on Wednesday February 24th, 2010.
- Applicable **Energy Star** appliances:
 - Refrigerators
 - Water heaters
 - Air conditioners
 - Laundry washer
 - Dishwasher
 - Freezers

ENERGY AFFAIRS ADMINISTRATION

Government of Puerto Rico

Energy Conservation and Efficiency

–Energy Efficiency and Conservation Block Grant (EECBG)

- Provided funds to the central government (Energy Affairs Administration) and to municipalities for projects that:
 - Reduce energy consumption
 - Improve energy efficiency
 - Reduce fossil fuel emissions by employing efficient use of Renewable Energy Systems.
- Puerto Rico received a total of \$33.9M
 - 24.3M for municipalities with more than 35K habitants.
 - 9.6M for the Energy Affairs Administration
 - » 5.6M are for non-entitled municipalities.
 - » 1M for non for profits (9 out 31 entities were chosen, announced on March 2nd 2010)
 - » 1.6M for energy auditing and retrofitting in 4 government buildings

ENERGY AFFAIRS ADMINISTRATION

Government of Puerto Rico

Renewable Energy Sources

- How is PREAA adopting Renewable Energy Sources:
 - Developed the Renewable Energy Systems Certification Regulation.
 - Efficiently managing State Energy Programs (American Reinvestment and Recovery Act of 2009)

ENERGY AFFAIRS ADMINISTRATION

Government of Puerto Rico

Energy | Programs and Incentives

- State Energy Program (SEP)
- Revolving Loan Program
- Upcoming Legislations
 - Renewable Portfolio Standard (RPS) and Renewable Energy Credits (RECs)
 - Green Energy Funds

ENERGY AFFAIRS ADMINISTRATION

Government of Puerto Rico

SEP – Overview

- The purpose of this program is to promote the conservation of energy, **to reduce the rate of growth of energy demand**, and to **reduce dependence on imported foreign oil** through the development and implementation of a comprehensive State Energy Program that includes:
 - Energy Conservation
 - Renewable Energy
 - Energy Efficiency Projects
- Projects under this award must promote job creation, stimulate the economy and be **“shovel ready”**.

ENERGY AFFAIRS ADMINISTRATION

Government of Puerto Rico

SEP – Overview

- SEP Regulation includes the following sub-programs:
 - Sun Energy Program
 - Wind Energy Program
 - Building Energy Efficiency Retrofit Program
 - Solar Water Heater Rebate Program
 - Agriculture Renewable Energy Program

ENERGY AFFAIRS ADMINISTRATION
Government of Puerto Rico

SEP : Sun Energy Sub-Program

- The Sun Energy Program will provide rebates for the purchase and installation of solar energy systems in homes, and businesses.
 - **Homes:** \$4/watt based on the total system capacity up to 50% of the cost, 15,000 max.
 - **Businesses:** \$4/watt based on the total system capacity up to 50% of the cost, 100,000 max.

ENERGY AFFAIRS ADMINISTRATION
Government of Puerto Rico

Sun Energy Sub-Program Important Facts

- Eligible Costs:
 - SES Equipment, but Batteries and Charge Controllers are NOT included.
 - Installation Cost
 - Engineering and Design
 - Interconnection Cost
 - Permits
- Exclusions
 - Systems 2 kW or smaller will not be eligible for rebates.
 - Ground Systems can NOT exceed 60 kW based on NEPA categorical exclusions.

ENERGY AFFAIRS ADMINISTRATION

Government of Puerto Rico

SEP : Wind Energy Sub-Program

- The Wind Energy Program will provide rebates for the purchase and installation of small wind (<20kW) energy systems in **businesses** facilities.
 - Up to 50% of the cost, 100,000 max.
- 20 kW limit is based on NEPA categorical exclusion and to comply with shovel ready projects, as established by DOE.

ENERGY AFFAIRS ADMINISTRATION

Government of Puerto Rico

SEP : Building Energy Efficiency Retrofit Sub-Program

- The Buildings Energy Efficiency Retrofit Program will provide rebates for energy efficiency retrofit projects for businesses.
- Businesses - Up to 50% of the total cost with a maximum of \$200,000
- Energy Audits – Maximum of \$5,000 per audit on awarded projects (\$0.20/ft²)

ENERGY AFFAIRS ADMINISTRATION

Government of Puerto Rico

SEP : Building Energy Efficiency Retrofit Sub-Program Important Facts

- Eligible Cost:
 - Materials and equipment in accordance to eligible retrofit measures listed in Regulation #7792, Chapter 3, part VI.
 - Installation cost (without any required modifications)
 - Audit Cost
- Exclusions and Restrictions
 - New facilities and building expansions are NOT eligible for the rebate program.
 - Residential facilities are NOT eligible (townhouses, high-rises, apartments, etc.)
 - Buildings under construction or partially completed are NOT eligible.
 - Temporary occupied buildings.

ENERGY AFFAIRS ADMINISTRATION

Government of Puerto Rico

SEP : Solar Water Heater Rebate Sub-Program

- The Solar Water Heater Rebate Program will provide rebates to homeowners when they purchase a new solar water heater
- \$500 per household/applicant
- As per Puerto Rico law, **taxpayer can deduce balance of costs after rebate.**

ENERGY AFFAIRS ADMINISTRATION

Government of Puerto Rico

SEP : Agriculture Renewable Energy Sub-Program

- Provide rebates for the construction of new renewable energy projects in the agriculture industry
- Up to 40% of the total cost with a maximum of \$100,000.
- Funds **can be** matched by other rebates or incentives awarded by the PR Department of Agriculture
- Projects must be endorsed by the PR Department of Agriculture.

ENERGY AFFAIRS ADMINISTRATION

Government of Puerto Rico

SEP : General Notes

- The following requirements must be met in accordance to Regulations #7792 and #7796:
 - All renewable energy system (RES) equipment must be certified by PREAA
 - All RES installers must be certified by PREAA
 - All Energy Auditors must be certified by PREAA.
 - Any net metering equipment must be in compliance with PREPA requirements under Act 114 "Net Metering".
 - For government facilities, or government occupied facilities, equipment must comply with the Buy-American provision of the Recovery Act.

ENERGY AFFAIRS ADMINISTRATION

Government of Puerto Rico

SEP : Applicant Required Documents

- Fill out the Rebate Reservation Form (RRF) and additional documents indicated on the RRF
- Download documents at www.afi.gobierno.pr or www.aae.gobierno.pr.
- Submit application package to:
 - PR Infrastructure Financing Authority
 - Capital Center, North Tower, 16th Floor
 - 235 Arterial Hostos Avenue
 - San Juan, Puerto Rico 00918-1454

ENERGY AFFAIRS ADMINISTRATION

Government of Puerto Rico

SEP : Application Procedure

- After submitting all required documents and application form, PRIFA will determine the eligibility and feasibility of the project.
- If project is approved (and funds are still available), PRIFA will send a notification for a rebate reservation (for a period of 6 month), in which the project must be completed.
- Once the system is installed, connected, and completed, the applicant should present to PRIFA a Rebate Reclaim form. Then, PRIFA will send an inspector for project approval.
- After final approval, PRIFA will emit the rebate within 30 days calendar from the date of approval.

ENERGY AFFAIRS ADMINISTRATION

Government of Puerto Rico

SEP : Revolving Loan

- **Loan program** for small and medium business.
- Designed to fill typical "finance gaps" in renewable energy and energy conservation oriented investments.
- Loans for eligible projects, offering up to 50% of investment with a maximum of \$300,000.
 - **4.95%** interest.
- Eligible projects include: **wind, sun, and retrofit.**
- Loan Application through Economic Development Bank (BDE)

ENERGY AFFAIRS ADMINISTRATION

Government of Puerto Rico

Renewable Energy Reform New Legislation

- The Renewable Energy Reform will consist on the following:
 - Adopting a Renewable Portfolio Standard (RPS) by law.
 - Energy Policy that enforce the generation of electricity from renewable energy sources, hence promotes diversification of the energy mix and reduction of dependency on fossil fuels.
 - Requiring a minimum percent of renewable energy generation in P.R. of 15% for 2020.
 - Implement a Renewable Energy Credits (RECs) system
 - Certificate representing an asset or economic value, which can be bought, sold and transferred between people, and represents the equivalent of one (1) megawatt hour (MWh) of electricity generated by renewable energy sources or eligible renewable alternate sources.

ENERGY AFFAIRS ADMINISTRATION

Government of Puerto Rico

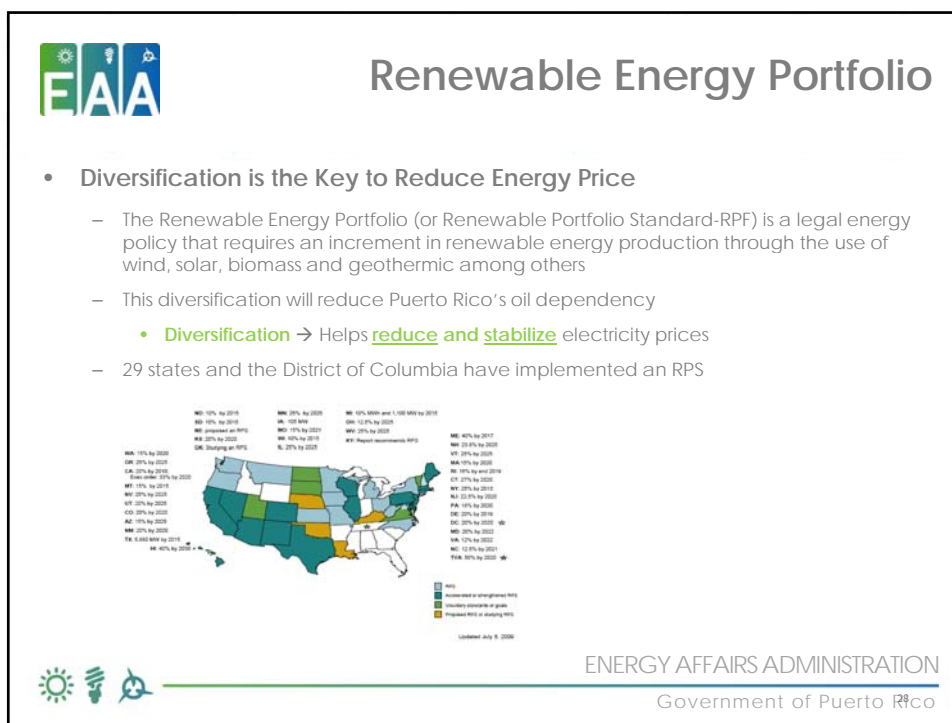

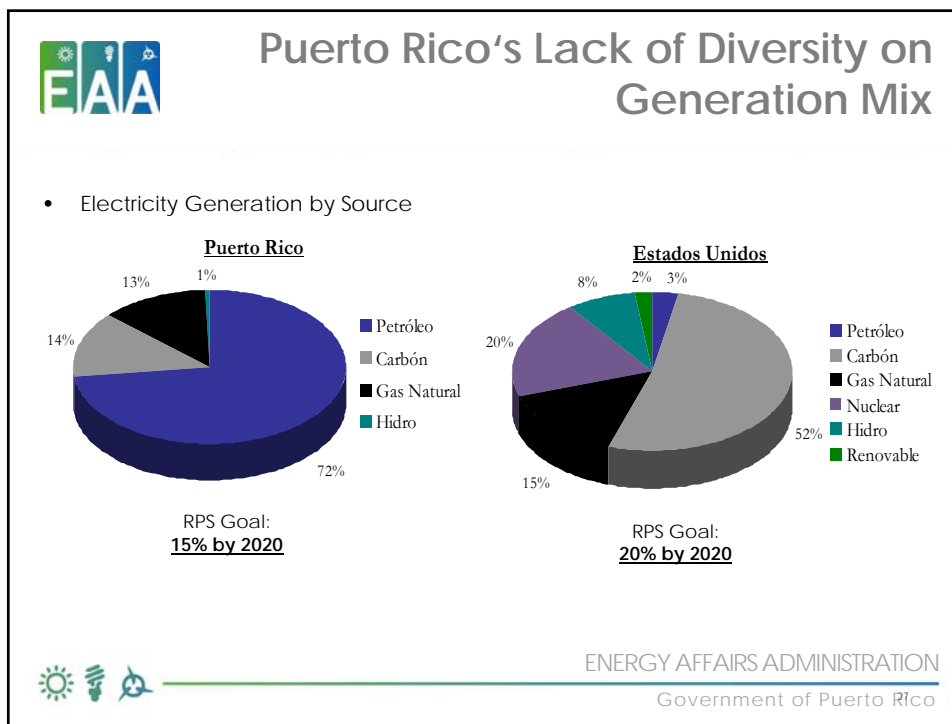

Renewable Energy Reform New Legislation

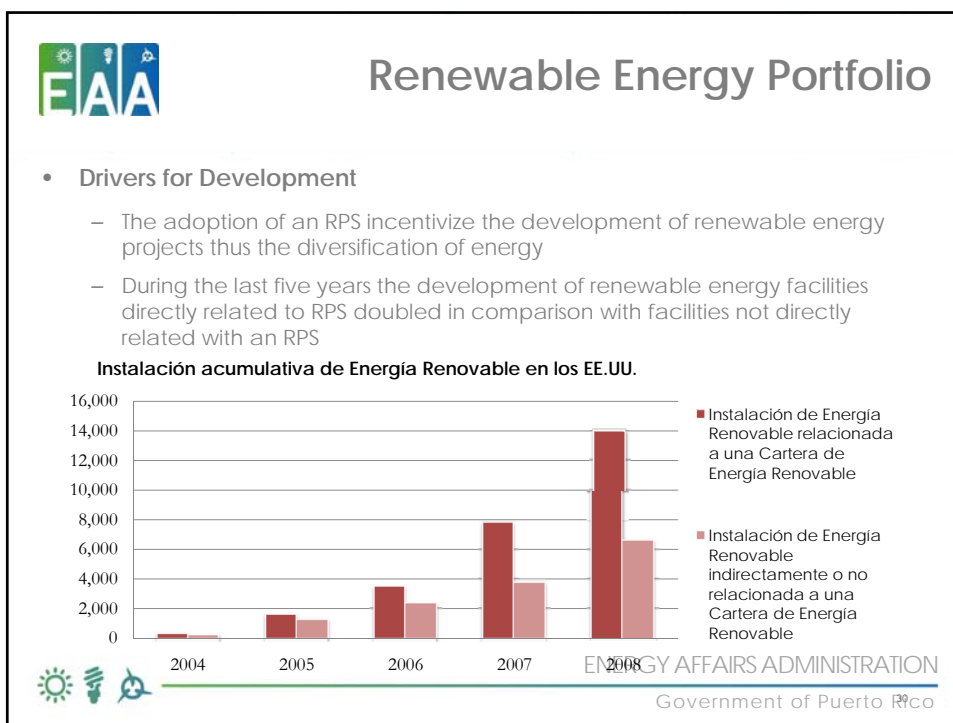

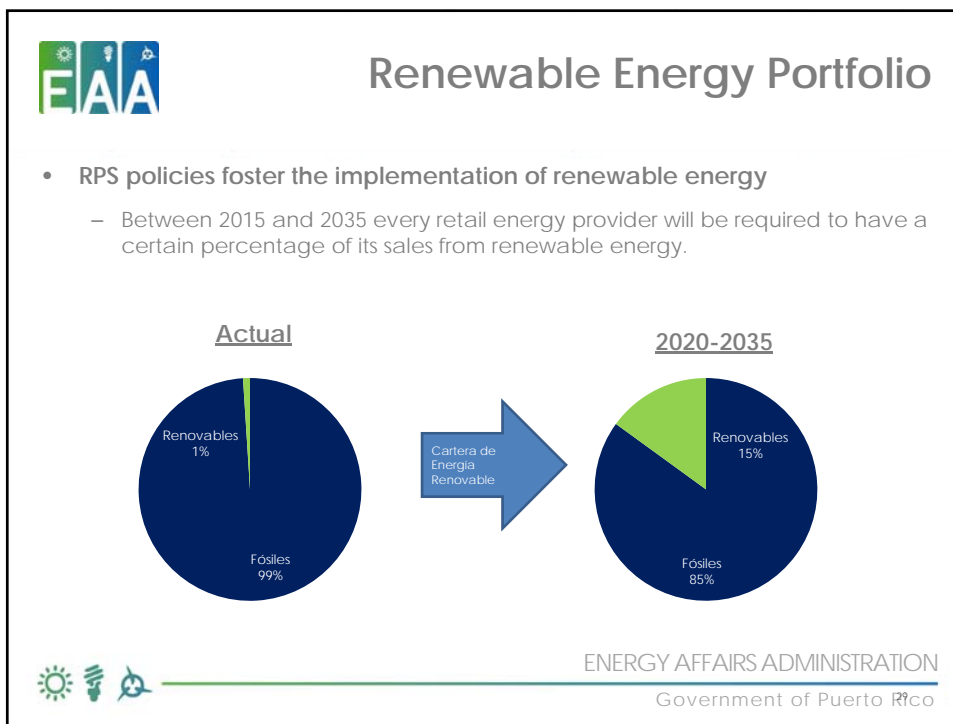

- Creation of a Green Energy Fund
 - All financial incentives will be granted by a special fund called Green Energy Fund, an investment fund for future generations
 - Will promote and develop a new and robust green industry, and create thousand of green jobs.

ENERGY AFFAIRS ADMINISTRATION

Government of Puerto Rico

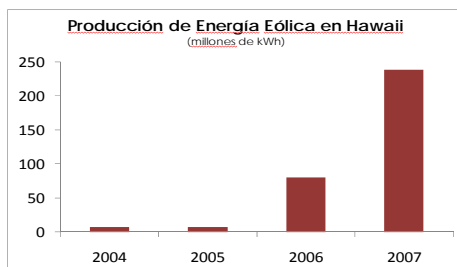

Renewable Energy Portfolio

- **Hawaii's Case Study**

- Hawaii and Puerto Rico have similar economies ("island economies")
- The first RPS approved by the State of Hawaii was on 2004
- From 2004 to 2007 wind energy production increased from 7 million kWh to 238 million kWh

ENERGY AFFAIRS ADMINISTRATION

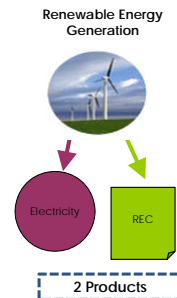

Government of Puerto Rico

Renewable Energy Credits

- **Creation of Renewable Energy Credits (RECs)**

- Puerto Rico will adopt a Renewable Energy Credit system
- **REC** - a **certificate** considered as an instrument with economic value that can be bought, sold or transferred between persons and that represents the equivalent of one (1) MWh of electricity generated from a renewable energy or alternate renewable energy source

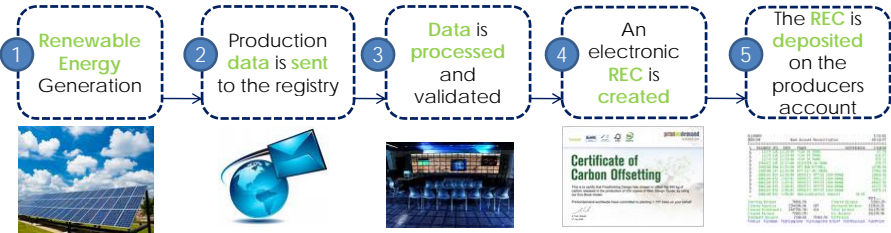

ENERGY AFFAIRS ADMINISTRATION

Government of Puerto Rico

Renewable Energy Certificates

- **Production Incentives based on RECs**
 - RECs will be registered in the North American Renewable Registry. This will facilitate the marketability of RECs in the US.
 - RECs have their own **economic value** and they are **marketable** in the United States. Entities required to comply with an RPS from the other 29+ states or companies with corporate social responsibility could buy PR's RECs.

ENERGY AFFAIRS ADMINISTRATION
Government of Puerto Rico

Renewable Energy Certificates

- **Creation of a Renewable Energy Commission**
 - A Renewable Energy Commission will be created comprised of 5 members to oversee the transparency of the RPS compliance
 - The Renewable Energy Commission will be responsible for the compliance and fiscalization of the RPS
 - The Commission will have additional faculties related to renewable energy

RENEWABLE ENERGY COMMISSION

EAA

DEDC

PB

GDB

Treasury

ENERGY AFFAIRS ADMINISTRATION
Government of Puerto Rico

Green Energy Fund

Tier 1	<p>Small Scale</p> <ul style="list-style-type: none"> Allow individuals and small companies have more control over energy prices thus reducing expenses and increasing available incomes Project size: 0—100 kW Market: Residential & Small Businesses Incentive: Up to 60% in reimbursements
Tier 2	<p>Medium Scale</p> <ul style="list-style-type: none"> Establishes a dynamic market that will attract new investments in the manufacturing of renewable energy equipments Project size: 100 kW + —1 MW Market: Industrial and Commercial Incentive: Up to 50% in reimbursements
Tier 3	<p>Utility Scale</p> <ul style="list-style-type: none"> Considerably reduces oil dependency, creates an economic stimulus and green jobs are created Project size: 1 MW+ Market: Independent Power Producer Incentive: Access to the RECs market

ENERGY AFFAIRS ADMINISTRATION
Government of Puerto Rico

Green Energy Fund

- **Tax Exemption**
 - Furthermore, the Energy Bill creates a **special tax exemption** for companies whos primary purpose is the generation of **renewable energy**.
 - These companies will have the advantage similar to those in Act 73 of 2008:
 1. A **fixed tax of 4%**
 2. A reduction on the property and municipal tax
 - In addition, the lifespan of the decrees will be of 25 years which is consistent with the expected life of a renewable energy equipment and their commercial agreements (e.g. PPAs)

Life of equipment:
25 years

➔

Tax Decree: 25
years
